## Contents

**List of Contributors** ix

**Foreword: Martin Aitken FRS** xiii

**Acknowledgements** xv

**Introduction: Archaeological science: a current perspective. D. Brothwell and A.M. Pollard** xvii

### SECTION 1. DATING

Overview – Dating in archaeology; past, present and future  
*R.E.M. Hedges*  
1 Quaternary geochronological frameworks  
*J.J. Lowe*  
2 Radiocarbon dating  
*R.E. Taylor*  
3 Dendrochronology and other applications of tree-ring studies in archaeology  
*P.I. Kuniholm*  
4 Trapped charge dating (ESR, TL, OSL)  
*R. Grün*  
5 Uranium-series dating  
*A.G. Latham*  
6 Magnetic properties and archaeomagnetism  
*R.S. Sternberg*  
7 Obsidian hydration dating  
*W.R. Ambrose*  
8 *In situ* cosmogenic isotopes: principles and potential for archaeology  
*F.M. Stuart*  

### SECTION 2. QUATERNARY PALAEOENVIRONMENTS

Overview – Environmental reconstruction  
*K.J. Edwards*  
9 Modelling Quaternary environments  
*A. Wise*  
10 Insects as palaeoenvironmental indicators  
*M. Robinson*  
11 Non-marine mollusca and archaeology  
*R.C. Precece*  
12 Mammals as climatic indicators  
*D.W. Yalden*
Contents

13 Peat stratigraphy and climate change
   K. Barber and P. Langdon
14 Archaeology and soil micromorphology
   D.A. Davidson and I.A. Simpson
15 Taphonomic investigations
   R.A. Nicholson
16 Global biogeochemical cycles and isotope systematics – how the world works
   A.M. Pollard and L. Wilson

SECTION 3. HUMAN PALAEOBIOLOGY

Overview – Human palaeobiology: then and now
   J.E. Buikstra
17 Pleistocene and Holocene hominid evolution
   D.R. Brothwell
18 Human palaeobiology as human ecology
   H. Schutkowski
19 Disease ecology
   D.J. Ortner
20 Assessment of age at death and sex in the adult human skeleton
   M. Cox
21 The study of preserved human tissue
   M.R. Zimmerman
22 Palaeodemography
   A.T. Chamberlain
23 Body tissue chemistry and palaeodiet
   J. Sealy
24 Cremated bone
   J.I. McKinley and J.M. Bond

SECTION 4. BIOMOLECULAR ARCHAEOLOGY

Overview – Archaeological science in the biomolecular century
   A.M. Pollard
25 Ancient DNA
   T.A. Brown
26 Blood residues in archaeology
   P.R. Smith and M.T. Wilson
27 Survival and interpretation of archaeological proteins
28 Lipids in archaeology
   R.P. Evershed, S.N. Dudd, M.J. Lockheart and S. Jim
29 Archaeological microbiology
   G. Grupe

SECTION 5. BIOLOGICAL RESOURCE EXPLOITATION

Overview – At the beginning of the task: the archaeology of biological remains
   C. Higham
30 Biological resource exploitation: problems of theory and method
   M. Charles and P. Halstead
### SECTION 6. INORGANIC RESOURCE EXPLOITATION

**Overview** – Materials study in archaeology

*M.S. Tite*

48 Electrochemical processes in metallic corrosion
   M. McNeil and L.S. Selwyn
49 Post-depositional changes in archaeological ceramics and glasses
   I.C. Freestone
50 The deterioration of organic materials
   J.M. Cronyn
51 The deterioration of bone
   A. Millard
52 Maximizing the life span of archaeological objects
   D. Watkinson

SECTION 9. STATISTICAL AND COMPUTATIONAL METHODS
   Overview - Numbers, models, maps: computers and archaeology
   R.D. Drennan
53 Spatial information and archaeology
   M. Gillings
54 Multivariate analysis in archaeology
   M.J. Baxter
55 Applications of the Bayesian statistical paradigm
   C.E. Buck
56 Animal bone quantification
   T.P. O'Connor
57 Quantification of broken objects
   M.J. Shott
58 Numerical modelling in archaeology
   M.W. Lake
59 Synthesizing analytical data - spatial results from pottery provenance
   H. Neff
