A note to the reader	xi
1 Ways of knowing: an introduction	1
<i>An outline of the method</i>	5
<i>Missions for this book</i>	21
<i>An outline of the story</i>	28
2 World-readings: the meanings of nature and of science	33
<i>Variety in modern Western medicine</i>	34
<i>Meanings and readings</i>	37
<i>Renaissance cosmologies</i>	39
<i>Disenchantment?</i>	41
<i>Natural theology and natural diseases</i>	45
<i>Revolution, respectability and evolution</i>	48
<i>Science, progress and the State</i>	50
<i>Modernist human-natures</i>	53
<i>Nature and culture</i>	55
3 Natural history	60
<i>'Historia' and representation</i>	62
<i>New worlds, new properties and new creators</i>	64
<i>Natures for pedigree people</i>	68
<i>Natural empires</i>	73
<i>Popular natural history</i>	76
<i>Displays of technology, new and old</i>	77
<i>'Natural history' now</i>	80

4	Analysis and the rationalisation of production	83
	<i>Analysis from the ancient world</i>	86
	<i>Analytical aspirations</i>	87
	<i>The elements of chemistry</i>	89
	<i>Analysis for engineers</i>	92
	<i>Analysis and 'physics'</i>	95
	<i>Rationalised production</i>	99
	<i>Rationalisation and identities</i>	100
	<i>Production and analytical sciences</i>	102
5	The elements of bodies, earth and society	106
	<i>Medical analysis: corpse and patient</i>	106
	<i>Analysing plants and animals</i>	115
	<i>Sciences of the earth</i>	122
	<i>Analysing the social</i>	125
	<i>Reflections on the institutions of analysis</i>	130
6	Experimentalism and invention	135
	<i>Meanings of experiment</i>	137
	<i>Experimental histories</i>	138
	<i>Experimentation and the age of analysis</i>	139
	<i>Synthesis in chemistry</i>	141
	<i>Experimentation in biomedical sciences</i>	143
	<i>Experimentation in physical sciences</i>	146
	<i>On clouds, dust and control</i>	151
	<i>Experimentalism and hierarchies of knowledge</i>	154
	<i>Experiment and invention</i>	157
7	Industries, universities and the technoscientific complexes	162
	<i>Analysis and established technologies</i>	165
	<i>Electrical analysis and synthesis</i>	168
	<i>Electrotechnics and industrial laboratories</i>	172
	<i>Dyestuffs and pharmaceuticals</i>	174
	<i>Remedies for/from microbes</i>	176
	<i>Science and industry in and after the First World War</i>	178
	<i>Technosciences in and after the Second World War</i>	183
	<i>Coda</i>	186

8 Technoscience and public understandings: the British case c.2000	189
<i>'No one understands us'</i>	193
<i>Science back in business</i>	195
<i>The study of 'public understanding of science'</i>	197
<i>The politics of technoscience</i>	199
<i>Understanding public science</i>	203
<i>Analysis and the bounds of 'science'</i>	206
<i>Publics and natural histories</i>	209
<i>Public understandings and world-readings</i>	216
<i>Science, values and history</i>	220
 Bibliography	 226
Index	260
